

Credit Risk Model Monitoring Report

MONITORING-REPORT-01

Derived governance presentation artifact. Frozen source evidence remains authoritative.

PORTFOLIO SIMULATION - NOT PRODUCTION DEPLOYMENT - M01-M06 ARE NOT CALENDAR PERIODS

1. Executive monitoring summary

Model XGBT-01; freeze DF-01; threshold THRESHOLD-01 (PD $\geq$ 0.080). Current open alerts: 329; open critical: 26.

2. Scope and evidence basis

TRAIN is the feature/population reference; development validation is the score/performance reference. M01-M06 are simulated evidence. M06 outcomes are synthetic.

3. Data quality and source governance

Technical scoring and governance authorization are independent. Source-loss may remain technically scoreable while authoritative use is blocked. CND-02 remains OPEN.

4. Feature drift

Feature PSI severity, predictor materiality and alert severity remain separate. Findings are investigation signals and do not establish root cause.

5. Prediction monitoring

M04 preserves score PSI and risk-positive-rate change as distinct indicators; no combined prediction-drift score is invented.

6. Performance and calibration

SYNTHETIC SCENARIO EVIDENCE - NON-EMPIRICAL - NOT EXTERNAL VALIDATION. M01-M05 remain NOT_ASSESSABLE because outcomes are unavailable.

Metric	Value	Severity	Role
roc_auc	0.5580	CRITICAL	DIRECT_ALERT_DRIVER
performance_ks	0.1059	CRITICAL	DIRECT_ALERT_DRIVER
pr_auc_average_precision	0.1735	N/A	SUPPORTING_CORROBORATION
gini	0.1160	N/A	DERIVED_ONLY
observed_expected_ratio	1.7966	CRITICAL	DIRECT_ALERT_DRIVER
brier_score	0.1237	N/A	SUPPORTING_CORROBORATION
log_loss	0.4569	N/A	SUPPORTING_CORROBORATION
recall_default_capture	0.3953	CRITICAL	DIRECT_ALERT_DRIVER
specificity	0.7036	N/A	SUPPORTING_CORROBORATION
precision	0.1747	N/A	SUPPORTING_CORROBORATION
false_negative_rate	0.6047	N/A	DERIVED_ONLY

7. Segment and subpopulation evidence

12 families; 32 levels. M06 discrimination: 21 eligible / 11 insufficient. Threshold/error rates: 26 eligible / 6 insufficient. This is not fairness certification.

8. Alerts and model-health decisions

Authorization, evidence scope, component health and overall health are independent. Blocked runs retain NOT_ASSESSABLE health.

9. Operational history and lifecycle

Phase 11 source alerts: 329. Current OPEN: 329. Comparable longitudinal history rows: 0.

10. Governance conclusions and limitations

CND-02 remains OPEN; Threshold-boundary-density remains CONTROLLED_DEFERRED; Synthetic outcomes only; No production deployment; No empirical production performance; No external validation; No fairness or regulatory certification; No real lending decisions. External/OOT labelled confirmation remains required for external-performance claims.
